

To whom it may concern:

I, Deborah A. Garcia, was admitted to Memorial Hospital on August 3rd of 2006. I was admitted for a rectal wound that almost cost me my life. I went through at least five operations to remove all of the infection. I was left on a wound vac that really didn't seem to work very well for me. I was told it would take six to nine months to heal on the wound vac. Then I was transferred to Woonsocket Health Center where I met a wonderful nurse named Lisa K. McDonald. She told me she came from Specialty Medical Equipment. She introduced me to the Blue Sky Versatile 1 wound vac. As I am a very bad diabetic, I would like to say thank you to Lisa and to your company for the treatment that I received. And as a diabetic I hope that you continue to use the Blue Sky Versatile 1 wound vac on other people. I myself was happy to use it for about two months and come home to my family two days before Thanksgiving Day. I am writing this letter to let you know that me and my family, which is a very big family, want you to know just how thankful we really are. Hope that you all have a very good holiday and God Bless all of you.

Thanks Again,
Deborah A. Garcia

P.S. Please give my special thanks to Lisa for being so good and so kind.
